

# DOMESTIC AFTER CARE & MAINTENANCE GUIDE

WHILST EVERY EFFORT HAS BEEN MADE TO ENSURE THAT YOUR STONEBOND SURFACE IS OF THE HIGHEST QUALITY, IT WILL LOOK AND LAST LONGER IF A FEW MAINTENANCE PROCEDURES ARE ADOPTED.

SIMPLY KEEP YOUR STONEBOND SURFACE REGULARLY SWEEPED CLEAN AND FREE OF LEAVES AND DETRITUS IN ORDER TO PREVENT MOSS GROWTH. AN OCCASIONAL HOSEPIPE IS RECOMMENDED. WEED KILLER MAY BE APPLIED TO THE SURFACE ANNUALLY TO PREVENT FURTHER GROWTH.

A JET WASH CAN BE USED ON THE SURFACE ALTHOUGH EXTREME CAUTION SHOULD BE TAKEN AS CONTINUOUS USE AT A CLOSE PROXIMITY TO THE SURFACE CAN LEAD TO LOOSENING OF THE STONES. BLEACH MAY BE APPLIED TO THE SURFACE TO REMOVE STAINS PLEASE RINSE OFF THOROUGHLY.

## VEGETATION:

Provided any weeds evident prior to surfacing have been removed it is highly unlikely that any new growth will be sustained. Any moss or weed growth that does occur should be treated with an appropriate herbicide. Ingrained algal growth can be removed and the colour of the original surface restored, by the application of a bleach solution.

## OIL SPILLAGE:

The British weather will normally wash oil stains away. However it is advisable to wash the affected area with detergent and warm water in order to minimise the risk of residual staining.
